Buy with Confidence !

Made in the U.S.A.

All of our harnesses are hand assembled in the U.S.A.

Correct Color Wires

Our harnesses always match the original factory color codes and gauge sizes. We use U.S.A. made Cross Linked Polyethylene type GXL wire which is much more tolerant to heat than the original PVC type GPT wire that was used from the factory.

Dip Soldered (when applicable)

All terminals are dip soldered (when applicable) to limit resistance loss.

Correct Connectors & Terminals

With over 300,000 connectors and terminals in stock you can be sure the harness you receive will look identical to the original.

Correct Non-Adhesive & Cloth Tapes

All harnesses are wrapped with the correct non-adhesive or cloth woven tapes to assure a 100% factory appearance.

Technical Support

We don't expect our customers to be "wiring-wizards", you can call us direct with any technical questions you may have.

Custom Modifications

Custom modifications are available to allow you to convert from an external regulated alternator to an internal regulated alternator. This modification is available for most '63 and up GM cars and trucks. We can also convert many of our engine harnesses to work with H.E.I. distributors and electric chokes. Our modifications retain the factory appearance. Call our Customer Service Department for more details.

Reproduction Switches

We manufacture an extensive line of reproduction switches. These include Turn Signal, Backup Light, Neutral Safety, Wiper, Headlight Switches and others. As with all of our restoration products our switches will fit and function perfectly, just like the originals.

Guarantee & Warranty

We are so confident in the quality of all of our restoration products that we offer the following guarantee and warranty. If you are not 100% satisfied with the quality of any of our restoration products we will give you a full refund. Just return the unused item within 30 days of receipt for a full refund. We also offer a full 1 year replacement warranty on all of the products we sell (see our product warranty sheet for more info).

Method of Payment

We accept Visa, Master Card, American Express and Discover. If you prefer to pre-pay your order, we accept Money Orders, Cashiers Checks or Personal Checks. C.O.D. shipments are also available.

Features an ATO Type Fuse Block

ATO Type Fuse Block with additional, fully integrated power ports allow the restorer to easily tap power for aftermarket electronic devices such as audio accessories, electric fans & ignition boxes.

Features Factory Type Connectors

Original factory type connectors are used on every wire. Wire colors match the OEM specs, but heavier gauge wires are used on the appropriate power circuits to accommodate aftermarket accessories.

Classic Auto Fuse Series Dash Harnesses

Check Out These Outstanding Features

• Upgraded Main Power Circuits

The main power circuits have been upgraded to ensure the extra capacity of the new Classic Auto Fuse Series fuse block. No need to worry about splicing onto existing fuses and circuits for aftermarket type accessories and overloading the fuse.

• Three Constant Battery Power Accessory Ports

Original Glass Series fuse boxes have only one port. These 3 ports supply constant battery power regardless of the ignition switch position. Each of these ports has a maximum fuse capacity of 10 amps.

• One Instrument Cluster Lamps Accessory Port

Original Glass Series fuse boxes have only one port. This port is used to access the rheostat circuit on the headlamp switch, so the optional lamps connected to this port will dim and brighten with the dash lamps. This port has a maximum fuse capacity of 1 amp which is perfect for night lights in tachs and gauges etc.

• Two Ignition Power Accessory Ports

Original Glass Series fuse boxes have only one port. These 2 ports supply switched battery power when the ignition switch is in the run position only. Each of these ports has a maximum fuse capacity of 5 amps.

• Two Accessory Power Accessory Ports

Original Glass Series fuse boxes have only one port. These two ports supply switched battery power when the ignition switch is in the run or accessory position only. Each of these ports has a maximum fuse capacity of 5 amps.

• Three Spare Fuse Ports

These three Spare Fuse Ports have an undefined fuse rating that can be designed by the customer based on the individual need and each port can handle up to 20 amps per cavity. If all three are not used, restorers may increase the remaining individual fuse ratings up to 30 amps for the remaining one to two cavities. In order to use these spare fuses, the optional kit part number 39383 "Spare Fuse Power Wiring Extension Harness" will be required. Instructions are included with this kit.

Optional Items for Classic Auto Fuse Series Dash Harnesses

Breakerless SE Single Wire Ignition

Simple 1 Wire Hook-Up, just connect the original points wire to the module

Completely stock appearance

Emissions Legal in all 50 States

Three year warranty

The Breakerless SE allows you to convert any 1957 to 1974 GM, AMC or Jeep V8 breaker point type distributor (with a windowed type distributor cap) to a reliable solid-state electronic ignition, utilizing a fully integrated trigger and power module that fits completely inside the distributor. Unlike competitive systems though, no additional wires protrude from the distributor, only the original points wire. The result is a state-of-the-art ignition with an absolutely stock appearance. The Breakerless SE is so unique that it's patented !

Outstanding features of this unit include:

- Single wire operation to preserve stock appearance and simplify wiring.
- Active dwell control maintains high rpm spark energy while reducing coil heating at idle.
- Auto-standby prevents coil damage or dead battery if the ignition is accidentally left on.
- Hall effect rotary-vane sensor design compensates for worn bearings and distributor end play. Magnetic sensor is unaffected by oil, dirt or other contaminants, unlike optical systems.
- Over-voltage/over-current protected against damage from high amp battery chargers, reversed battery, or improper wiring.
- Constructed with premium quality components. Sealed, hi-temp thermoplastic housing provides exceptional resistance against moisture and vibration.
- No distributor modification, disassembly, or removal is required.

Kit comes complete with everything you'll need to install the Breakerless SE Single Wire Ignition. Kit includes: 1 Module, 1 (two-piece) vane, all necessary installation hardware and a comprehensive instruction sheet.
